

WOS designed, engineered and manufactured drilling and milling bits

PulverizR™ PDC Bits

 Designed with total operation in mind

About This Product

The WOS line of PulverizR PDC bits cover a wide range of operation types from conventional drilling to unconventional drillouts. Bits engineered and manufactured 100% in house by WOS are designed for long service time and high working efficiency in various downhole environments. Eliminating the risk of losing a cone, these fixed bits are engineered for performance, consistency and durability. Available in several configurations including tubing remediation, frac plug removal and formation drilling.

Benefits

- No moving parts eliminates cones left downhole
- No rev limit allows to drill further longer
- Effective in both stickpipe drill string and coiled tubing conveyance
- Available as a thru tubing, drilling and cleanout options - 1.71" - 12.25"

 Eliminates risk of losing cones

PulverizR™ PDC Bits

Features

- Balanced design with general purpose cutting structure and cutter technology
- Optimized PDC cutter to minimize cutting size
- Drilling and Completions bits designed for specific applications
- Cutter types, layout and geometry are continuously evaluated for performance

Accessories

- WOS PowR Motors
- WOS High Flow Check Valves
- WOS AV Sub
- WOS Flex Sub
- BitSavR
